

**PRODUCTS WE PRODUCE FOR COSMETIC AND
PRARMACEUTICAL AREA (UNDER FOLLOWING BRANDS):**

BRAND MA-ECO:

A-SEPT (Multi-purpose, disinfectant, alcohol-based detergent in the form of a spray. For disinfection of all kinds of surfaces). Declared as a biocide and registered as such by the Chemical Office of the Republic of Slovenia (Ministry of Health).

A-SEPT GEL (Multi-purpose, disinfectant, alcohol-based detergent in the form of a gel, with the scent of lavender. For personal hygiene). Declared as a cosmetic product.

Both products are declared and registered with the Office of chemicals and biocides.

BRAND MARISEPT (MARIBORSKE LEKARNE – MARIBOR):

MARISEPT Spray (Multi-purpose, disinfectant, alcohol-based detergent in the form of a spray. For disinfection of skin and other surfaces).

A-SEPT GEL (Multipurpose, disinfectant, alcohol-based detergent in the form of a gel. For personal hygiene).

Both products are declared and registered the same way, as if under the brand MA-ECO.

BRAND AROMASEPT:

A-SEPT GEL Natural hand sanitizer (*Multi-purpose, natural, disinfectant, alcohol-based detergent in the form of a gel, with the scent of lavender and with added vitamin E. For personal hygiene.*)

AROMASEPT Spray (*Multi-purpose, natural, disinfectant, alcohol-based detergent in the form of a spray. For disinfection of skin and rooms, with essential oils and hydrolytes.*)

HAPPY FEET Spray (*For protection of hands and feet – a natural herbal deodorant that fights bacterial and fungal infections and at the same time reduces feet and hands sweating.*)

AQUASEPT COMPLEX (*An extremely effective biocide which kills bacteria and viruses, even in small concentrations using chlorine dioxide and herbal distillates - for disinfection of drinking water, surfaces...).*)

AQUASEPT CONCENTRATE (*A chlorine dioxide based concentrate for disinfection of drinking water and water systems.*)

ANTI MOSQUITO Spray (*An insect repellent spray (especially for protection against mosquitoes) is a natural plant complex that also repels gadflies, midges and flies).*)

ANTI TICK Spray (*A tick repellent spray made from a combination of natural essential oils and Pyrethrum, which repels ticks. Anti Tick Spray is a bio-based solution, which was created with human needs in mind.*)

AROMA freshener (*An organic, plant-based air freshener, which eliminates unpleasant odor from all living spaces).*)

CLIMA PLUS Spray (*A spray for disinfection of air conditioning systems. Eliminates bacteria Legionella pneumophillia, as well as other bacteria, fungi, molds and other pathogens in air conditioning systems and filters).*)

ANTI SMOKE Spray (*A natural, plant-based spray that eliminates and neutralizes odors of cigarette smoke and neutralizes tobacco, as well as other types of smoke.*)

All these products can be filled into packaging units ranging from 10 ml to 1 L (also larger on demand). Aerosols, i.e. technical sprays, can be filled with propellant gases: propane / butane, nitrogen, CO₂ etc. (if necessary also with other industrial gases, such as dimethylether, Freons ...).

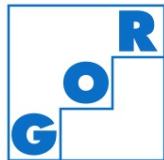

For filling of aerosols, we have two semi-automatic filling lines with charging volume of min. 900 pieces per hour (at doses of 250 ml) or min. 500 pieces per hour (at doses of 500 ml). Thus the smaller are the containers, relatively faster is the filling and vice-versa. We also have semi-automatic filling line for filling of non-aerosols (packaging units ranging from 10 ml to

500 ml) with a charging volume of min. 900 pieces per hour (at a volume of 200 ml) or min. 500 pieces per hour (at a volume of 500 ml) and a mechanical filling line for filling of non-aerosols (packaging units ranging from 100 ml to 1000 ml) with a charging volume of min. 500 pieces per hour (at a volume of 250 ml) or min. 300 pieces per hour (at a volume of 500 ml). For larger series (over 5.000 pieces), we use an automatic filling and sealing line (Pamasol), with minimum charging volume of 10.000 units of aerosols (of smaller volume) in one cycle – possible are three cycles per day (if a working day has 24 hours).

As such, we can offer to the market either a service of solely filling (customers repro material) or filling in terms of "outsourcing" (we provide either complete repro material, or at least a part of it for our customer). We also offer the service of preparation and mixing of substances (according to customers recipe) – for production of so-called intermediate products (more and less complex). Of course we also perform services of developing new products or improvement of the already existed products – both in cooperation with our customer's experts or on our own. Additionally, we also offer labelling of labels (etikets) on the products and apart from packing in cartons or laminating in thermo-shrink foil (up to 10 pieces per packet) etc., also stacking on pallets.
