

## Technical Datasheet

### KOROLAN - STOP – Anti Slippery Protection

**Product:** Water based. Ammonium florid. Biodegradable

**Product details:**

Delivery: plastic canister: 1 liter, 5 liters and 10 liters  
Ph value: < 4,6  
Form: Liquid  
Colour: yellow  
Density: 1.050 g/cm<sup>3</sup> at 20 °C

**Attributes:** Korolan- Stop is easy to use and an anti-slippery protection for natural stones. Korolan Stop causes a structural microscopic change of the surface of natural stones.

**Care :** Please see the care instruction for floors treated with anti-slippery protection in order to maintain the anti-slippery effect.

**Usage:** Natural stone, especially suited for polished granite.  
Tiles, clinker bricks. **Not suitable for marble.**

- Handling:** Clean the surface with KOROLAN Basic cleaner.  
Leave the stone to dry.  
Apply Korolan-Stop on the dried surface.  
Depending on the quality of the stone the residence time will take up to 25 to 45 minutes. During that time keep the surface moist with repeated applications of Korolan-Stop.  
Mega-Stop will work only on moist surfaces. Please avoid blistering. If the blistering is too big the chemical reaction will not occur.  
After the residence time remove Korolan-Stop with plenty of water.  
Use KMP-Ground cleanser to neutralize.  
Use wet suction machine for excess water.  
The treated surface can be used straight away.
- Information:** The surface needs to be treated according to the instructions. Adjacent facades or components like aluminum, stainless steel, wood and fitted carpets need to be covered up (with PE foil) during the treatment.  
To treat the stone with Korolan-Stop the temperature in the stone needs to be minimum 5°C.  
Please avoid direct sun light.  
We assume no liability if Korolan-Stop is not used correctly.
- Consumption:** Concentrate Korolan - Stop  
1 liter for approx. 10 – 12 m<sup>2</sup>
- Shelf life:** Store in original canister, in a dry and frost free area  
Please immediately close canister after use.
- Durability:** Has use-before-date (approx 1 year)
- Tools:** Pad, mop, wet suction machine, Einscheibenmaschine
- Security, Ecology Disposal:** More information regarding security during transportation, storage, usage and disposal & ecology can be found in the latest security data sheet. All details are according to the latest development and application technology. As we have no influence on the handling of the product, we can assume no liability if Korolan-Stop is not used correctly. All additional information to this data sheet requires the written confirmation of the producer. The general terms and conditions apply. With this issue of the datasheet all former data sheets are revoked.
