Karl Koch
Inventor and founder
of KORO patent holders

Karola Dittmer
Managing Director of
KORO Natursteinschutz

Company chronicle **KORO**

KORO GmbH was founded in 1952 in Frankfurt/Main, Germany, through the partners Karl Koch and Duke von Roedern. Under the product name KORO PATENT HOLDERS Karl Koch has developed and secured several still untouched patents for his company, especially in the field of scaffold anchoring. Even after 50 years these patents have not been surpassed and still have the undoubted advantage of an unique technological breakthrough.

In 1977 Mrs. Karola Dittmer, daughter of the founder joined the company as companion. Since then she has been responsible as managing director of the technical part of the company. The company is now situated in near Frankfurt/Main.

In 1990 Mrs. Karola Dittmer initiated and led first test series under a separate name of the company. After a short period of time excellent cleansing and impregnating agents for natural stones prevailed on the market under the company and product name "KORO® MEGA PROTECTION".

For environment's sake We keep the stone alive ... !

Products

During the development of our products it was our declared aim to lance environmental friendly, biologically degradable agents on the market, in order to avoid by high sense of responsibility additional harm to our environment. Our products have been developed on the basis of the latest standard of technical know-how and the cleaning legislation and are furnished with packaging out of materials to be recycled.

Chemical characterisation of our products: solutions of anionic and non-ionic surfactants. Main constituents are on water basis with additives of different ingredients. They are modern polishes out of polymers and hard waxes. They are also water repellent, UV-resistant, non-skidding surfaces.

Pursuing the EC Guidelines and the applicable national legislation the product is not subject to compulsory identification labeling. Harmful effects of the products are unknown. All our products have safety data sheets and technical data sheets and are all marked with a UBA number (UBA = German Authority of Environment).

Attribute: biologically degradable

Biologically degradable means merely molecular decomposition of organic substances (e.g. waters or ground) by complete influence of living organisms. Biologically degradable products are based on raw materials, solved and film structured not entirely hardened products. Only in a solved status they are degradable. After the products are coated on they harden and become resistant so that they cannot be washed off with water. Polymers and waxes are entirely separated in purification plants. Emulsifying agents are biologically degradable and do not contain any nonylphenole ethoxilates (APEO).

- Tests and analysis done by Fraunhofer Institute
- Capillary of the stone stays open; the stone structure is not destroyed
- Requirements of Slip Protection is fulfilled without destroying the stone
- Our products are odourless and contain non toxic substances
- No corrosion, no acid even when using Cement Dust Remover or Basic Cleanser

Care and Protection of natural stone – very often ignored!

To stay healthy people consult doctors, do sports and take medication if necessary. Even a car gets a regular inspection – oil and filter changes are normal.

Can we keep natural stone healthy?

Strong **sunlight** heats up stone surfaces, causing very fine fissure. Even **strong rain** is washing out the stone in endangered zones. **Air pollution** like **carbon monoxide** and sulphuric **acid weaken** the structure. **Graffiti which penetrate** into the stone are also dangerous as are normal **weather pollution** and **rubbing off** through pedestrians and machines.

Precautions and regular care with special cleansers and impregnations extend not only the life of natural stones but also secure the natural look. Our experience gained through decades of working in this branch, the knowledge of the market and the deep understanding for care and conservation of natural stones predestine us for this task.

Product Overview

CLEANSER FOR NATURAL STONES

<u>Basic Cleanser 1100</u>	Basic Cleanser 1100 is a highly effective remover of pollution. The special composition achieves optimal results.	
<u>Basic Cleanser 5010</u>	Highly effective basic cleanser for alkali-resistant surfaces. Dissolves and removes actively and thoroughly even polymer and wax substances.	Alkaline

SPECIAL - CLEANSER

<u>Moss & Mould Remover 2001</u>	Removes mould and damp stains on tiles, natural stones and plastering.	Alkaline
<u>Rust & Lime Remover 302</u>	Liquid rust and lime remover with protection against corrosion. Not suitable for marble or limestone.	Strongly acidic
<u>Mega Orange</u>	Solves difficult cleaning tasks. Removes grease, oils, wax, paint, varnish, adhesives and felt-tip stains. Removes odours.	Neutral
<u>Aluminum & Niro Special Cleanser</u>	Special cleanser for aluminum and stainless steel surfaces. Cleanses and prevents corrosion. Also suitable for high pressure cleaning machines	Acidic
<u>Grease ex</u>	Highly concentrated cleanser for the hygienic cleaning of grease and encrustation.	

GLOSSY CLEANSER & CARE

<u>Glossy Impregnation 5007</u>	Applied after basic cleansing. Protects and cares especially on heavy duty floors. Leaves an anti slippery and water resistant protection and a glossy shine.	Slightly alkaline
<u>Glossy Protection 5002</u>	Janitorial cleaning product for concrete surfaces and sealed wood floors (parquet). Nice gloss without any polishing.	Alkaline
<u>Stainless Steel Protection 1051</u>	Care cleanser for stainless steel based on oil. Fingerprints and stripes will be avoided. Water resistant.	Neutral
<u>Stainless Steel Protection Spray 1100</u>	Protection spray for polished aluminum and stainless steel surfaces. Leaves a water resistant film behind. Avoids finger prints.	FCKW-free

CARE CLEANSER

<u>Care Cleanser 5004</u>	Soapy and glossy cleanser for janitorial cleaning, anti slippery and leaves a natural shine on concrete floors.	Neutral
<u>Care Cleanser 113</u>	Concentrated cleanser, removes pollution. Suitable for all washable surfaces. Cleansing especially for matt surfaces.	Neutral
<u>Care Cleanser 200</u>	Concentrated cleanser, removes pollution. Suitable for all natural stones and tiles. Also suitable for wooden floors.	

All products are bio-degradable!

KORO MEGA PROTECTION®

Graffiti Protection Impregnation

Anti-Slip Protection Metal Protection

GRAFFITI PROTECTION

GRAFFITI PROTECTION H-MA - K

Graffiti Protection H-MA-K offers intensive protection against pollution. It prevents paint from finding its way into the porous natural stone and preserves the natural colour of the stone. H-MA-K contracts the capillary without closing them and is UV resistant. The product consists of environmentally friendly substances which are completely secreted. The emulsifiers are bio-degradable. The treated stone will not change in colour or appearance.

GRAFFITI PROTECTION H - PL - D

Graffiti Protection H-PL-D prevents graffiti paint from adhering and penetrating the polished stone without changing the colour of the stone. The product is UV resistant on polished marble stone and granite. H-PL-D consists of environmentally friendly substances.

GRAFFITI PROTECTION P-MA SEMI PERMANENT

Graffiti Protection P- MA offers intensive protection against pollution. It prevents paint from finding its way into the porous natural stone and preserves the natural colour of the stone. H-MA-K contracts the capillary without closing them and is UV resistant. Graffiti P- MA consists of environmentally friendly polymers which are completely secreted. The treated stone receives slight colour intensity. Certificate of the Fraunhofer Institute.

GRAFFITI PROTECTION VA 8008 SEMI PERMANENT

Graffiti Protection VA-8008 offers intensive protection against pollution and prevents paint from finding its way into the stone; it is limited acid resistant and preserves the natural colour of the stone. It contracts the capillary without closing them and it is UV resistant. Graffiti Protection VA 8008 consists of environmentally friendly polymers which are completely secreted.

All products are bio-degradable!

IMPREGNATION

KORO® MEGA PROTECTION

IMPREGNATION H-MA

The impregnation is water based for polished, is suitable for polished, sandblasted and matt natural stone, sandstone or limestone.

Water- and pollution resistant.

IMPREGNATION H-PL

Impregnation based on solvents for polished stone, marble or granite, for tiles, concrete, limestone but also for grinded stone.

Water – and pollution resistant.

IMPREGNATION H-D

Impregnation based on solvents to intensify the colour of all coloured stones. The original colour of the natural stone will be intensified. It is especially visible on dark or black stone. Prevents the penetration of moisture and pollution.

IMPREGNATION VA 8000

Product VA 8000 is mainly used on used and worn-out older natural stones because of its resistance. The product achieves a homogenous protecting polished effect which also protects the floor against slippery. Impregnation is based on polymers.

METAL IMPREGNATION

Mega - Con - B

Conservation for polished, lacquered, coated and anodized metal surfaces. The product prevents the penetration of graffiti on metal facades. Mega Con B does not change appearance or look of aluminum or metal facades. The applied product will not be washed off the metal surface, therefore no liquid waste.

Mega - Con - U

Conservation for unvarnished and anodized metal and stainless steel surfaces. The product prevents the penetration of graffiti on metal facades. Mega Con U does not change appearance or look of aluminum or metal facades. The applied product will not be washed off the metal surface, therefore no liquid waste.

ANTI SLIP PROTECTION

Mega - Stop

An anti slip product for polished granite and tiles. Mega Stop causes a microscopic structure change on the surface which works also on wet areas. Slip protection can be maintained durably with the respective care product. Janitorial cleaning with Basic RG.

GLOSS & CARE

Glossy Impregnation 5007

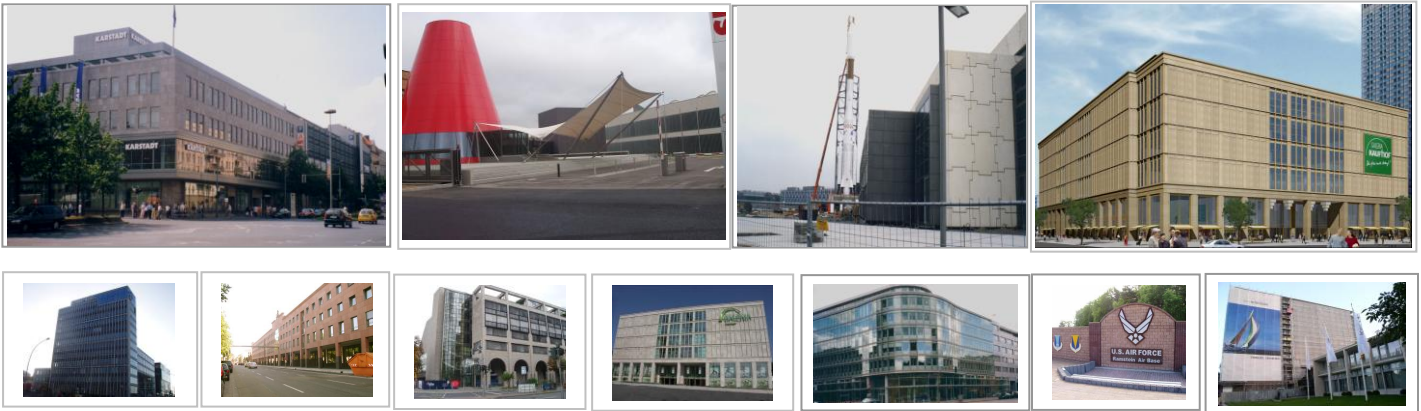

Applied after basic cleaning. It protects and cares especially on heavy duty floors. Leaves an anti slippery and water resistant protection and a glossy shine.

Glossy Protection 5002

Janitorial cleaning product for concrete surfaces and sealed wood floors (parquet). Nice gloss without any polishing.

All products are bio-degradable!

Facades

Cleansing with

- Basic Cleanser 5010
- Basic Cleanser 110

Antigraffiti

Basaltino / raw granite / lime stone / polished marble / shell lime stone / sand stone / Serpentino etc.

ANTIGRAFFITI H-MA-K for raw, slightly polished and porous stones

Antigraffiti H-MA-K offers intensive protection against pollution, prevents paint from finding its way into the porous natural stone and preserves the natural colour of the stone. It contracts the capillary without closing it and is UV resistant. Graffiti protection H-MA-K consists of environmentally friendly substances, which are completely secreted. The treated stone will not change colour, appearance and structure. The product dries without leaving marks. The Graffiti protection is applied on the dry, oil free, greaseless and dust free façade with a spray or sponge. The consumption depends on the absorption of the stone. Apply 1-3 times until the stone is satiated completely.

ANTIGRAFFITI H-PL-D for polished natural stones

Antigraffiti H-PL-D prevents graffiti paint from adhering and penetrating the natural stone without damaging the stone. The product is UV resistant on polished marble stone or granite. H-PL-D consists of environmentally friendly substances. Biodegradable. The graffiti protection is applied on the dry, oil free, greaseless and dust free façade with a pad, cloth or sponge. The consumption depends on the absorption of the stone. Apply 1-2 times

ANTIGRAFFITI METAL - ALUMINIUM FACADES

- **Mega - Con - B/ 1**
Protection for varnish, coat and anodised metal façade
- **Mega - Con - U/ 1**
Protection for unvarnished metal and stainless steel, Aluminum

Mega Con prevents the penetration of graffiti on a metal façade. Mega Con doesn't change colour and appearance of the aluminum or metal façade. The product will not be washed down from the metal façade and therefore, no damage is done to the environment.

IMPRÄGNATION FOR - METAL-ALUMINIUM FACADES

- **Mega - Con - B / 2**
Protection for varnish, coat and eloxide metal façade
- **Mega - Con - U / 2**
Protection for unvarnished metal and stainless steel, Aluminum

The impregnation serves not only as protection against moistness but also of corrosive environmental influences. It is UV resistant. Mega Con doesn't change colour and appearance of the aluminum or metal façade. The product will not be washed down from the metal façade and therefore, no damage is done to the environment. The product is especially designed for stainless steel and aluminum.

Stainless Steel Protection 3003

Care cleanser for stainless steel on oil basis. The product provides a beautiful gloss on stainless steel. It develops a water resistant protection, which prevents unsightly fingerprints.

Gloss Care Chrome and Stainless Steel

After cleansing with Aluminum and Niro cleanser our water resistant Gloss and Protection Spray should be applied on stainless steel and chrome surfaces.

With the special combination of neutral oils, mineral oils and silicone oils it achieves a protecting and beautiful gloss. Environmentally friendly propellant gas (FCKW-CKW free).

IMPREGATION H-MA – for raw, slightly porous materials

Basaltino/ / raw granite / lime stone /
polished marble / shell lime stone / sand
stone / Serpentino etc.

IMPREGATION H-MA

Impregnation H-MA offers intensive protection against pollution prevents paint from finding its way into the porous natural stone and preserves the natural colour of the stone. It contracts the capillary without closing it and is UV resistant. Graffiti protection H-MA-G consists of environmentally friendly substances, which are completely secreted. The treated stone will not change colour, appearance and structure. The product dries without leaving marks. Biodegradable.

The Graffiti protection is applied on the dry, oil free, greaseless and dust free stone with a spray or sponge. The consumption depends on the absorption of the stone. Apply 1-3 times until the stone is satiated completely.

IMPREGNATION H-PL for polished natural stones and tiles

IMPREGNATION- PL

Impregnation H-PL prevents moisture and pollution from penetrating the natural stone without damaging the stone. The product is UV resistant on polished marble stone or granite. H-PL consists of environmentally friendly substances. Biodegradable. The graffiti protection is applied and rubbed in on the dry, oil free, greaseless and dust free stone with a pad, cloth or sponge. The consumption depends on the absorption of the stone. Apply 1-2 times.

Floors and Walls – Impregnation

Cleansing with :

- Basic Cleanser 5010
- Basic Cleanser 110
- Stains Remover for Moss and Mould 2001
- Cleanser for Rust and Lime 302

Protection with :

- Impregnation H-MA colourless
- Impregnation H-PL polished
- Impregnation H-D wet effect
- Impregnation Slip protection and Gloss VA 8000

Cleansing and Care with :

- Care Cleanser 113
- Care Cleanser Gloss 5004
- Care Cleanser for Brilliancy 5002

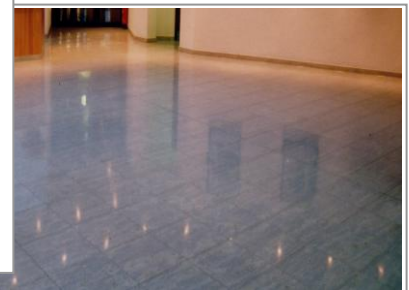

IMPREGNATION – colour intensifying H-D Wet look

for all raw to finely natural stones. Especially intensive on dark natural stones.

Treatment with Impregnation H-D presents polished or sand polished stones with a wet look, which intensifies the original colour of the natural stone. This wet look treatment is especially notable on dark or black stones. The treatment prevents the penetration of liquids or dirt into the natural stones. H-D is UV resistant and consists of environmentally friendly substances. Biodegradable.

Slip Protection Granite Floors KOROLAN- STOP

For shopping centers, banks, hospitals, schools, public buildings etc. Slip protection is mandatory for all floors in highly frequented public areas. Our product fulfills the slip protection requirements class R9 on polished granite, artificial stone in tiles and other materials. It causes a microscopic structure change on the surface. MEGA STOP also works in wet areas but this might cause a slight colour change.

Slip protection can be achieved through the treatment with MEGA STOP, which can be maintained with the respective cleanser. The perfectly balanced care product: Basic Cleanser 110. We recommend the cleaning with a brush (remove with liquid sucker) every 6 months to maintain the microscopic structure on the surface.

Protection and Care with :

- Basic Cleanser 110
- Basic Cleanser 5010

Please note:

To maintain the Slip Protection the cleansing products should not have any refatting or coating substances which contain soaps, waxes, scents or emulsifying agents. Don't use acid cleansers.

KMP Basic Cleanser 110 and 5010 are especially designed for these demands and guarantee long lasting anti slippery protection. We recommend to renew the protection every half year with a brush. This ll ensure a long lasting effect. Ensure that you change the cleansing liquids often to achieve a complete removal of the dirt.

24 hours of genuine citric acid – no chance against the

Two component product– Impregnation VA 8000

Mega - Protection all along the line.....

Acid resistant protection & impregnation is avoiding corrosion – even after 24 hours the glossy impregnation is still working. The impregnation lives up to its promise!

After intensive tests we succeeded to develop a special two components impregnation product for **marble, granite** and **tiles**. Apart from its general protection it also has the ability to be resistant to acidic liquids like in fruit juice and red wine.

Impregnation VA 8000 is especially suitable for jeopardized natural stone and tile surfaces because of its resistance to acidic liquids like in hotels, restaurants or other similar areas.

Resistant to acidic liquids like fruit juices!

On heavily used and worn-out natural surfaces the product achieves a homogenous polished effect which also protects the floor against slippery. The product VA 8000 is water-, oil- and corrosion resistant; it is also UV resistant, environmentally friendly and bio-degradable.

Special Product: Polishing Slip Protection VA 8000

VA 8000 special product for worn-out marble floors, granite

VA 8000 is a polishing slip protection product that gives the worn-out and heavily used floor a natural shine. At the same time it will also protect the floor against slippery. The treated stones will not change colour, appearance and structure. It will get a silky matt to polished surface. MA-History is UV resistant and consists of environmentally friendly polymers, which are completely secreted.

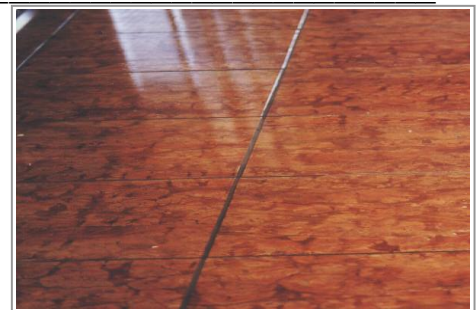

Special Cleanser Gloss Care and slip Protection 5007

Cleanser for all surfaces, floors, windowsills, tables, cover plates, grave stones etc. The treated stone is given an extremely strong and resistant gloss. 5007 is a slip protection. To keep the slip protection and the gloss simply use the especially designed care product 5002.

Gloss Care 5002

Cleanser for all surfaces, floors, windowsills, tables, cover plates, grave stones etc.

The treated stone is given an extremely strong and resistant gloss. 5002 is water and pollution resistant and is also a slip protection. UV resistant. Biodegradable.

Care Cleanser 5004 Gloss

Care Cleanser 5004 is a strong cleansing and caring product for natural stones, concrete floors and tiles.

As it doesn't consist solvents Care Cleanser 5004 especially harmonises with impregnated surfaces but is also effective on non-impregnated surfaces. Biodegradable.

Basic Cleanser 110

Cleanser for all surfaces, floors, windowsills, tables, cover plates, grave stones etc.
Granite Marble Sandstone

before

after

Moss Remover 2001

Cleanser for heavily moss covered surfaces Works anti bacterial

Granite* Marble * Sandstone

Rust and Lime Remover 302 Cleanser against rust and lime

Granite Sandstone **Not to be used on marble stone, lime stone**

Korolan Orange

Paint stains, adhesives, ink, felt tip, chewing gum, mineral colours.
Finish off with Basic Cleanser 5010.
